Aspiring **frontend developer** with a specialization in **React** development. A highly **passionate learner** and have worked on 5+ personal projects. With 3+ years of experience as a digital marketer, I value **user experience**, **promoting**, and **monetizing** web services. My professional background enables me to develop optimal frontend applications by enhancing **collaboration with the marketing and business teams** and seeing the product from a business standpoint.

EXPERIENCE

Puppy Time Vancouver - Web Designer & Web Developer

Apr 2021 - Aug 2021

- Designed and developed the website from scratch including the page structure, theme, and UI/UX, which increased their brand awareness and achieved new clients.
- Collaborated with the marketing team and created the website SEO strategy-wise.
- Used: **Squarespace, HTML, CSS, JavaScript, Figma**

sann, Inc. - Online Advertising Operation

Oct 2019 - Dec 2020

- Supported sales team with building ad campaign strategies by analyzing clients' past performances such as CPM or CPC or marketing trend data.
- Reported the results and suggested the next actions to the clients, which led to continuous contracts and incremental revenues.
- Created tools that reduced human-errors by ~90% and automated repetitive duties with Google products such as Spreadsheets or App Script.
- Used: **JavaScript (Google App Script)**

PERSONAL PROJECTS

Go-to Pomodoro

🌐 https://go-to-pomodoro.vercel.app/

🐙 https://github.com/shiv-chan/go-to-pomodoro

- Built a responsive web app that the user can customize her/his own pomodoro timer with favourite BGM playing by embedded YouTube video player.
- Created a timer with minimal time logging.
- Composed Styled Components to change the theme colour according to its session.
- Used: **React, Redux, IFrame Player API, Styled Component, Material UI, Figma**

Weather App

🌐 https://react-weather-app-peach-mu.vercel.app/

🐙 https://github.com/shiv-chan/react-weather-app

- Implemented code with both Context API and Redux to see the difference.
- Fetched data from API asynchronously with passing a query using createAsyncThunk.
- Used: **React, Redux, Open Weather API, Sass**
